PROFESSIONAL SUMMARY

Results-driven Web Developer and Mechanical Engineering graduate with over two years of experience in designing, developing, and deploying high-performance web applications. Proficient in JavaScript, Vue, React, and Next.js, with a strong foundation in full-stack development, automation, and e-commerce integrations. Currently advancing expertise in Data Science and Machine Learning to drive data-informed decision-making in software development. Passionate about optimizing digital experiences by merging engineering principles, data analytics, and innovative technology solutions to deliver impactful results.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Google Cloud Platform (GCP)
- **Infrastructure & Orchestration:** Terraform, Kestra, Mage, Prefect, Airflow
- **Data Engineering Tools:** BigQuery, dltHub, Kafka, dbt, Apache Spark
- **Data Analysis & Visualization:** Google Sheets, Excel, Metabase, Tableu
- **Programming Languages:** JavaScript, Python
- **Frameworks & Libraries:** React.js, Vue, Next.js, Node.js, Bun, Deno
- **Data Science & Machine Learning:** Scikit-Learn, Pandas, NumPy, Tensorflow
- **Tools & Platforms:** Git, Docker, Firebase, PostgreSQL, MySQL
- **Web Development:** REST APIs, WordPress, Elementor, E-commerce Integrations
- **Languages Spoken:** Filipino, English, Basic Japanese

PROFESSIONAL EXPERIENCE

Software Engineer - Web Developer (Remote)   **July 2022 - February 2025**
GrandShipper | New York, USA
- Led the complete software development lifecycle, from concept to deployment and post-launch maintenance.
- Developed integrations with e-commerce platforms (Wix, TikTok Shop, Walmart, Shein), increasing user engagement by 30%.
- Focused on enhancing performance and user experience across multiple projects.
- Enhanced website performance and user experience across multiple projects.
- Maintained company website, optimizing lead generation using WordPress and Elementor.

Freelance Web Developer (Remote)   **August 2023 - October 2024**
R&H Dental | Marbella, Spain
- Customized website and landing pages, generating a 35% increase in leads.
- Automated client communication workflows, improving operational efficiency for the clinic.

Production Division Staff   **August 2021 - April 2022**
Sumi North Philippines Wiring System | Pangasinan, Philippines
- Designed and implemented process improvements in production, contributing to increased team efficiency.
- Led a small team of engineers and production workers in achieving operational goals.

University Instructor   **August 2020- July 2022**
Virgen Milagrosa University Foundation, Inc. | Pangasinan, Philippines
- Taught foundational engineering courses, including Algebra, Trigonometry, Calculus, and Thermodynamics.
- Supervised junior students in Mechanical Engineering, guiding them through academic and project-based work.

EDUCATION

Data Engineering Zoomcamp
DataTalks | Ongoing

Bachelor of Science in Mechanical Engineering
Pangasinan State University - Urdaneta City Campus
